

Concept

- is the notion of Multifunctionality operational enough?
- From the EU perspective, is there a need to compile 25+ values systems and expectations?
- is there a difference between Landscape and MF?
- does the CORCs provide a typology for a possible analytical framework
- is the complexity sufficiently represented regarding the assessment of the goals to achieve?

Goal

- is MF only an analytical framework?
- is the goal agricultural policy or sustainable development? both?
- how do we analyse and take into account the multiple changes taking place currently?

Tools

- Identification of functions
 - can an economic value be provided?
- Are externalities sufficiently measured?
- Trade-offs between functions
- is pluridisciplinarity sufficiently operational?
- how to deal with the « gap » between Positive and Normative approaches?
- Are models being developed operational for policy making?
